This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. THE FOUNDERS.

"THEIR WORKS DO FOLLOW THEM."

THE memory of the men who established the first Medical School in this country will ever be cherished by the Profession. They are :—JOHN STEPHENSON, ANDREW FERDINAND HOLMES, WILLIAM ROBERTSON, and WILLIAM CALDWELL.

In October, 1822, these gentlemen, constituting the Medical Board of the recently organized General Hospital, adopted resolutions in favour of the establishment of a Medical School. On the 4th of February, 1823, the following advertisement was issued :—

"Montreal Medical Institution.

"THE medical officers of the Montreal General Hospital having seen the great difficulties which the student of medicine in Canada has to encounter before he can acquire a competent knowledge of his profession; knowing the inconvenience resulting to many from the necesssity at present existing of spending several years in a foreign country to complete a regular medical education; considering that the recent establishment of the Montreal General Hospital affords the student a facility of acquiring a practical knowledge of physic never before enjoyed in this Province, and that this advantage will be greatly

enhanced by delivering courses of lectures on the different branches of the profession, held a meeting to consider the practicability of founding a Medical School in this city.

"The circumstances which rendered the success of such an institution probable, and the measures intended to be adopted for carrying the same into effect, having been submitted to His Excellency, the Governor-in-Chief, he was pleased to signify his entire approbation of the plan.

"It is therefore resolved to deliver lectures on the following branches of the profession, to commence on the second week of November next ensuing :—

Anatomy and Physiology.....J. STEPHENSON, M.D.
Chemistry and Pharmacy.....A. F. HOLMES, M.D.
Practice of Physic.....W. CALDWELL, M.D.
Midwifery and Diseases of Women and Children.....W. ROBERTSON, Esq.
Materia Medica.....H. P. LOEDEL, Esq.
Surgery.....J. STEPHENSON, M.D.

"In the course of the summer, 1824 :—

Botany.....A. F. HOLMES, M.D."

JOHN STEPHENSON

Was born in Montreal in 1797. Educated in "le College de Montreal," he then went to Edinburgh with his friend A. F. Holmes, and after graduating in Arts, proceeded to the degree in Medicine in 1820 ; his Thesis being "De Velosynthesis." Returning to Montreal, he was elected on the staff of the General Hospital, and was energetic in the establishment of the Medical Institution, in which he lectured on Surgery, Anatomy, and Physiology. He was the first Secretary of McGill College. He died in 1842, aged 45.

ANDREW FERDINAND HOLMES

Was born in Cadiz in 1797, studied Medicine with Dr. Daniel Arnoldi, and obtained the Provincial License in 1816. Proceeding to

Edinburgh he graduated in 1819. Thesis "De Tetanu." He was early elected a member of the Hospital Staff, and lectured on Chemistry, Pharmacy, and Botany, in the Medical Institution. In 1843, he succeeded Dr. Robertson as the lecturer on Medicine. In 1853 he was made the first Dean of the Medical Faculty. He died in 1860, aged 63.

WILLIAM ROBERTSON

Was born in Perthshire in 1784. Studied Medicine in Edinburgh. Appointed Assistant Surgeon to the 49th Regiment, he served through the war of 1812, being present at the storming of Niagara ; at the declaration of peace, he retired on half-pay and settled in Montreal. He was a member of the first Medical Board of the Hospital ; lectured on Midwifery and Diseases of Women in the Medical Institution, and on Medicine, after Dr. Caldwell's death, in the Medical Faculty. He died in 1844.

WILLIAM CALDWELL

Was born in Ayrshire in 1785. Studied Medicine in Edinburgh. He was Surgeon to the 13th Regiment of Dragoons ; a member of the first staff of the General Hospital ; lectured on Medicine in the Medical Institution and in the Medical Faculty. He died of Typhus in 1833.

THE first session of which there is any record is that of 1824-25, at which twenty-five students attended. The Medical Institution continued for five sessions, and in 1829 became the Medical Faculty of McGill College, thereby preserving for educational purposes the bequest of the Hon. JAMES MCGILL.

In 1823 an attempt was made to organize McGill College and five Professors were appointed, one, Dr. Fargues, to the chair of Medicine. They never entered upon their duties.

Up to 1853 there was only one Professorship in the Medical Faculty. At this date the various Lecturers were made Professors.

AMONG those connected with the Medical Institution, must be mentioned H. P. Lœdel, Assistant Surgeon, Royal Artillery, who in the first advertisement has the lectureship on Materia Medica. So far as is known, he did not lecture. He died of Typhus in 1825.

THE lectures were suspended during the political troubles of the rebellion ; there were no sessions in 36-37, 37-38 and 38-39. It is owing to this gap that the present is only the 50th session, though the Faculty was organized in 1829. In reality, this is the 55th session of the School, which is the direct continuation of the Medical Institution, and the 58th year since its foundation in 1824.

THE lectures of the Medical Institution were given at No. 20 St. James Street ; the School afterwards moved to St. George Street ; from 1845 to 1852 the lectures were delivered in the College building, Sherbrooke Street ; from 1852 to 1872 in the Faculty building, Cotté Street ; and in 1872, the present building was erected by the Governors in the University Grounds.
